# JAMBIX B2B EXTRANET

Business to Business

Work collaboratively with transparency and clarity.

The Jambix Extranet allows travel companies to collaborate with clients online. By creating a platform where clients can see their bookings, access passenger information, see costs associated to itineraries, as well as print booking documents, clients have more visibility into existing bookings. Travel companies no longer have to publish product costs separately. The Jambix Extranet is the perfect place for clients to search products and see all the details including low season vs high season costs, extra charges for full board vs room only, etc. Login access defines what your clients see, so you can work collaboratively with all your clients. The Jambix Extranet helps you work better - together.

You can:
- ✓ Publish information, news, sample tours and contact details.
- ✓ Create and share tailor-made tours, for you and your client only.
- ✓ Upload and share tailor-made quotes privately.

Your clients can:
- ✓ Access/search Jambix catalog with approved suppliers, products, and client specific prices.
- ✓ Download tailor-made quotes and travel information.
- ✓ Access/search Jambix confirmed bookings. Receive notification via email of updated bookings.
- ✓ Download booking documents such as vouchers and tickets.
- ✓ Update pax information, such as passport numbers.

Frequently Asked Questions

Q: Can everyone access my Extranet?
A: No. You decide who you give access to and what they can see and do with your Extranet.

Q: When I change information, how long before my clients can see it?
A: Almost immediately. You make your changes in Jambix, this is then automatically updated to your Extranet - no extra step needed.

Q: Can my client change information to the bookings?
A: No, the Extranet's information comes from the Jambix Travel Management System, therefore only you can change the information. To your client, the information is read-only.

Q: Can my clients print their own Itinerary documents from the Extranet?
A: Yes! And vouchers too.

HOW WE MAKE IT WORK...

The Jambix Extranet is completely customizable. We build it to your needs, change the layout to your company branding, and you get to pick what you want to make visible and decide how you want to use it. Client pricing and products are specific and private for only those clients - it's all filtered by their Jambix login.

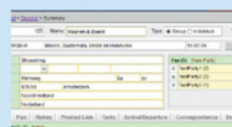

The Jambix Extranet works with the Jambix Travel Management System. You set up your suppliers, their products and prices, and then you enter your clients and their bookings. The Extranet allows you to publish the results in a customizable, accessible, and attractive way that your clients can work with no matter where they are or in what time zone.

THE JAMBIX WORLD

The Jambix eco-system includes other software and applications to ensure we have you covered. We manage your entire Travel business - efficiently, intelligently, and always without compromise.

TRAVEL MANAGMENT SYSTEM

A complete back-end to front-end booking system, easy to use and flexible. Your one stop solution to Travel management.

BUSINESS TO CUSTOMER

Use Jambix to sell directly to your customer. We create B2C sites that showcase your products using the info you already have in Jambix.

JAMBIX TRAVEL APP

The Jambix Travel app allows your travellers to access their trip details - on the go! A great way to stay connected to your travellers 24/7.
